Mercer Euro Nominal Bond Long Duration Fund

Mercer Euro Nominal Bond Long Duration Fund B22-0.1100-EUR (IE00BF12WK32)
(the "Fund")

a sub-fund of MGI Funds plc

This Fund is managed by Mercer Global Investments Management Limited

OBJECTIVE AND INVESTMENT POLICY

The investment objective of the Fund is to seek to generate returns which closely match the returns achieved on a portfolio of long-dated Euro denominated bonds.

The Fund will passively invest primarily in Euro denominated fixed income securities issued by Eurozone governments.

Debt securities are securities which represent an obligation of the entity issuing the security to repay the amount received for the security plus interest. The interest rates paid may be variable or fixed and payment may be deferred or paid in kind. The Fund will primarily invest in long-dated bonds with a minimum long-term debt rating of at least C by Standard and Poor's, or equivalent by Moody's or other rating agency. In purchasing securities for the Fund, the Investment Manager (or its delegate) will also invest in bonds which have a short term (maturity of less than one year) debt rating of at least C by Standard and Poor's, or equivalent by Moody's or other rating agency. Where no rating agency is available, the Investment Manager (or its delegate) may assign its own rating, which must be deemed the equivalent of C or better as rated by Standard and Poor's, or equivalent by Moody's or other rating agency.

The investment manager will identify a basket of fixed securities and weights to create a portfolio of Euro denominated bonds with a maturity of approximately 15 years ("Portfolio"). The Fund will invest in Euro denominated fixed income securities and money market instruments in order to seek to provide an exposure which closely matches the return of the Portfolio. The investment manager may use a bottom up and/or top down investment approach when selecting the underlying basket of securities.

Certain indices may also be used in the management of the Fund, including for investment purposes, as detailed in the Supplement.

The Fund may be fully invested in securities issued or guaranteed by any State, its constituent states, local authorities or public international bodies of which one or more States are members.

The Fund can invest in the securities directly.

The Fund will not invest more than 20% of its assets in Emerging Markets.

The Fund may invest in zero coupon or delayed interest securities, which pay no cash income until maturity or a specified date when the securities begin paying current interest and are sold at substantial discounts from their value at maturity.

The Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, 'FDI') for hedging, efficient portfolio management and/or investment purposes. FDI may enable the Fund to obtain market exposure up to 100% in excess of the value of the Fund's assets. The use of FDI may multiply the gains or losses made by the Fund on a given investment or on its investments generally.

The Fund will not distribute dividends. Income and capital gains from the Fund are reinvested.

You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom.

Recommendation: Investment in the Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved and believe that the investment is suitable based upon their respective investment objectives and financial needs.

RISK AND REWARD PROFILE

The risk and reward indicator value is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time.

The lowest category, 1, does not mean risk free.

The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.

The Fund is rated 4 due to the nature of its investments which include the risks listed below:

Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Multi-Manager or Fund of Funds: The Fund may in certain circumstances invest directly rather than through Underlying Funds. In such cases, the Fund will be directly subject to the risks identified here and in the supplement for the Fund.

Operational risk: All funds are subject to the risk that something could go wrong in the day-to-day running of an organisation.

Sovereign debt: Investment in sovereign debt securities might involve special risks. The issuer of the debt or the governmental authority that controls the repayment of the debt might be unable or unwilling to repay principal or interest when due. Economic uncertainty might increase the volatility of market prices of sovereign debt.

For more information on risks please refer to the "Special Considerations and Risk Factors" section in the prospectus and in the supplement for the Fund.

CHARGES

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year

----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less – you can find this out from your investment advisor or distributor.

The ongoing charges figure is based on expenses for the twelve month period ending 31st December 2019. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.
- Performance fees

For more information about charges and information about other share classes, please refer to the prospectus.

PAST PERFORMANCE

Past performance is not a guide to future results.

The past performance shown here takes account of all charges and costs. The entry/exit charges are excluded from the calculation of past performance.

The Fund was launched on 02/10/2018.

Past performance has been calculated in EUR and is expressed as a percentage change in the Fund's net asset value at each year end.

Past performance of the Portfolio, as calculated by the underlying sub-Investment Manager, is shown for comparison purpose.
